### **DETAILED ACTION**

### **RCE**

1. The request filed on 10/18/2005 for an RCE based on parent Application No. 10/802951 is acceptable and a CPA has been established. An action on the CPA follows.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 12 and 14-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Karg (US 5,957,149).

Regarding claim 12: Karg teaches a fluid diverter valve 10. The diverter valve comprises a housing 12 with an internal top surface and an internal bottom surface and a valve ring contained in said housing wherein said valve ring moves to the internal bottom surface on the application of a vacuum to the housing, see Figs. 1 thru 4 and col.3 lines 1-14.

Regarding claim 13: The diverter valve of Karg further comprises a plurality of tubes (outlet ports 17 and 18) connected to the internal bottom surface wherein the valve ring covers the plurality of tubes when a vacuum is applied to the housing, see col. 4 line 1-36.

Art Unit: 1763

Karg further teaches a first channel 18,a second channel 16. Fig. 5 and col.7 lines 30-41 teach that the communication is blocked between the channels when the ring is disposed on the bottom surface and when the ring is at the top the communication is permitted.

Claim 14: The aperture is annular chamber 60.

Claims 15, 16, 19, and 20: Col.3 lines 1-14 teach the application of a vacuum.

Claims 17 and 18: The application of a fluid is taught in col.4 lines 46-63 to overcome the spring force.

### Response to Arguments

4. Applicant's arguments with respect to claims 12and 14-20 have been considered but are unpersuasive. Specifically, the apparatus of Karg et al teaches the limitations of the claims. See the rejections above for the specific teachings.

### Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sylvia R. MacArthur whose telephone number is 571-272-1438. The examiner can normally be reached on M-F during the core hours of 9 a.m. and 3 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Parviz Hassanzadeh can be reached on 571-272-1435. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Application/Control Number: 10/802,951

Art Unit: 1763

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
